Proclamation

In these United States of America we are a fortunate people blessed with happiness, freedom, equality and justice made possible by our laws. In appreciation of these blessings, President Dwight D. Eisenhower has declared Friday, May 1, 1959, as LAW DAY, U.S.A.

Every day we citizens of the U.S.A. enjoy without special thought or thanksgiving the ever present and many blessings and benefits of our American system of government under our American Laws — the justice, equality, freedom and way-of-life which our American Laws have guaranteed to our citizens since our Constitution and our Bill of Rights.

In our City of Albany plans are under way for joining the rest of our great nation in celebrating LAW DAY, U.S.A., and, therefore, I, Jerome Blank, Mayor of the City of Albany, do hereby proclaim Friday, May 1, 1959, as Law Day, U.S.A., in our City of Albany, as a special day for appreciating the blessings and benefits which our American Laws grant to us, and I call upon all of our good citizens, organizations and schools to join in thoughtful thanks and in re-dedicating ourselves to good citizenship and the faithful observance of our laws.

Education Board In Meeting With Advisory Group

A joint meeting of the Albany School's Advisory Committee and the Board of Education was held Monday, April 20 to discuss the desirable objectives and goals for our schools as presented in professional staff and lay committee reports.

The similarity of the professional staffs and lay committee's reports was noted. Some of the suggested objectives were:

1. A sound academic program for students with all levels of ability.
2. A program which provides challenges to the talented or gifted child.
3. Special programs for the retarded and the emotionally disturbed.
4. A sound program in business, the arts, industrial arts and similar fields. The principal emphasis, however, should continue to be on the fundamental subjects.
5. A program that will provide opportunities for cultural development and leadership.
6. A thorough background in our American intellectual heritage which will instill belief in our American way of life.
7. A strong guidance and counseling system in which the parent as well as the pupil is an active participant.

Mr. Forry, Superintendent of the Albany Schools, pointed out that the various goals suggested are, in the majority, employed now, but it would be desirable to have the goals clearly defined for the benefit of the teachers, students and parents.

The lay-committee report was approved and the professional staff report endorsed by the Advisory Committee. Both reports will now be submitted to the Board of Education for their consideration and action.

The Albany Schools' Advisory Committee will hold their next meeting in the Board of Education Room, 904 Talbot Avenue, May 25. At that time the sub-committee on Counseling Services will present their report for discussion. The public is invited to participate.

The Albany Senior Center Foundation sent in a request to the city for a suitable building site upon which a building for the Albany Senior Citizens might be constructed. A 50 by 100 foot spot at the northwest corner of Memorial Park was suggested, and was unanimously approved by the council. The motion was by Mrs. Zehn, seconded by Councilman Howell. In seconding the motion Howell stated that he thought the city should not stop there, but that a starter fund to help out on the building costs should be considered in drawing up the next budget. The city attorney is to prepare a resolution covering the matter, and also to look into possible legal aspects.

Purchase of a new street sweeper at a cost of \$231.60 from the George L. Avery Co. was approved, and it is expected the machine will be delivered and in service within the next week or ten days. The city has been without a sweeper for several months.

Public hearings on two recommendations from the Planning & Zoning Commission, one for rezoning and one for setback, were called for Monday, May 11.

A petition signed by eight property owners in the 1100 block on Ordway, asking that steps be taken by the city to extend Acton Street north to Posen Avenue along the rear portion of their property, was considered by the city council at its meeting Monday night. Acton now is a dead-end street at the city's southern boundary.

After some discussion Councilman Keck moved, seconded by Donahue, to refer the matter to the city attorney, the planning and zoning commission and the city engineer, all to report back to the council. No date for a further hearing was specified, but it was understood the proposal would be again considered when the complete reports were all in. Approval of the referral action was unanimous.

The council also discussed at some length proposals to again submit to the electorate a bond issue on new buildings. At a bond election last November the request for \$500,000 to replace the police, fire and city hall buildings was turned down, failing to achieve the necessary two-thirds majority by approximately 200 votes. On the same ballot a request for approval of a building plan won by a substantial vote.

Mayor Jerome Blank told of a special meeting of the council on April 22, attended by three council members, chiefs of the police and fire departments, and City Engineer John D. Dayton, at which it was the consensus of opinion that a special bond election should be held this year.

The mayor said that construction costs are rising at the rate of 5 per cent a year, and that the buildings would cost some \$14,000 more in 1960 than if they were started in 1959. The city would still be well ahead even after spending the approximately \$5,000 for a special election, he said.

Mrs. Zahn objected on the ground that the city should wait until the regular spring election in 1960, rather than to hold a special election. She said that she felt a special election held this year would be "doomed."

Councilman Howell commented on the heavy repair costs arising from time to time on the old city buildings. "One of the main points in going for the election this year is that we will have to spend money on the police station and fire house, anyway," he said. "I'm sure that both the police and fire departments will ask for remodeling work in our next budget. I don't need to tell you what shape these buildings are in. To spend money on remodeling when we need new buildings is like throwing good money after bad."

"At the suggestion of Mayor Blank the matter is being held over a week awaiting cost estimates on a new city hall, but calling for a definite decision at next Monday's meeting. The plan would call for separate items on the ballot for the fire and police buildings, and for the new city hall."

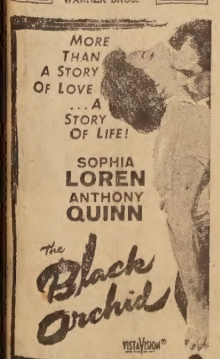

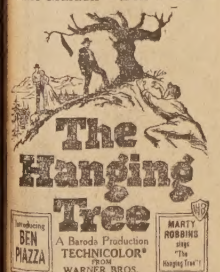

The Albany Senior Center Foundation sent in a request to the city for a suitable building site upon which a building for the Albany Senior Citizens might be constructed. A 50 by 100 foot spot at the northwest corner of Memorial Park was suggested, and was unanimously approved by the council. The motion was by Mrs. Zehn, seconded by Councilman Howell. Governor Brown Proclaims May 2 Fire Service Day

California Governor Pat Brown has proclaimed May 2 as Fire Services Day for the State of California. On this day all fire stations within the State will throw open their doors for the citizens. It gives them an opportunity to get a better understanding of what their fire departments are doing for the protection of life and property in the community.

Fire Chief Gerald D. Browne of Albany invites every citizen to the open house at the fire station located on San Pablo and Washington Streets, on this day between the hours of 10 a.m. and 8 p.m., with time out during the lunch and dinner hours. A uniformed member of the department will escort any visitor through the building, and there will be special displays of fire fighting equipment. Fire Chief Browne, who has spent many years in the collection of old photos and news clippings of former Albany residents, has become recognized as the unofficial Albany historian. His collection of early Albany will be on display at the fire station on Fire Services Day.

This is an opportunity that should not be overlooked by the citizen who wants to see first hand what his fire department has to offer.

Pacific Telephone's purchases build sales for California businesses

As we work to provide phone service for a growing California, we buy an ever increasing volume of materials.

This year, for instance, we and our supply unit Western Electric, will purchase supplies and services of all kinds from thousands of California businesses—large and small. We'll spend an average of \$850,000 with them every

working day. This money brings new income to merchants and manufacturers. Then it spreads out to the people they employ or trade with. From there, it circulates until it benefits nearly everybody in the State.

In this way, telephone purchases help build California's prosperity. And that's bound to mean a brighter future for you.

Pacific Telephone
Working together to serve you better...

NINETY-THREE MILES IS A LONG DRINK OF WATER!

Next month, this giant new 93-mile aqueduct leaves the drawing board to start getting built. By 1962, it'll be bringing you an extra 90,000,000 gallons of pure mountain water every day!

Twenty years ago, on that much water, you (and the rest of us in the East Bay) could have washed our cars, bathed our babies, and run our factories, with plenty left over to quench our thirst. But since then, we've been "discovered." The result? Thousands of new families and factories. And the need for another aqueduct.

Well, running a giant pipe from the Sierras to the Bay is no cinch, but we've done it twice before. Tunnelled through mountains, bought tons of steel, kept close tabs on money. (You've set aside \$68,233,000 for this job.) And it's worth it, knowing you'll have water—plenty of water—for years to come.

Booklet, anyone? All about water. Write

supply high-quality protein and

ARE WE TRYING TO GET OUT OF THE PASSENGER BUSINESS?

Some people seem to think we don't want to run passenger trains. This is a matter of great concern to us because running trains is our business and we expect to be running them for a long time. So we want you to know just how we feel about the important passenger side of our business:

- 1** We want to run passenger trains that you need and use. We welcome passenger business and we hope more people will ride our trains.
- 2** We want our passenger trains to be good trains. We think our passenger service is as good as any in the country... and we intend to keep it that way.
- 3** We feel, however, that it is sensible to limit our service to trains and schedules which many people need and use, and to discontinue those which few people use and which are obviously no longer needed.

More and more people are traveling by automobile and by air, fewer by train. But we have not been sitting idly by while the public's travel habits changed. We've spent millions of dollars in the last ten years on new passenger train equipment, and more millions promoting our service. In spite of our efforts, some of our trains have been carrying very few passengers.

We think it is better for everybody—for you and for us—to reduce or eliminate poorly patronized train service which causes heavy losses. Such losses become a burden on freight shippers and industry, and impair our ability to serve this great and growing Western region.
